

NICKEL, TITANIUM & COBALT ALLOYS – STAINLESS – LOW ALLOYS

High-performance materials for critical components serving the aerospace, defence, and energy sectors.

SPECIAL QUALITY ALLOYS

- FORGING
- RING ROLLING
- ROUND BAR STOCK
- FORGED FLAT BAR

SPECIAL QUALITY ALLOYS

Continental Works, Bessemer Road, Sheffield S9 3XN, England

FORGING

Open-die hammer forging. SQA manufacture rings, blanks, blocks, shafts, and bar with the strength and consistency demanded by critical applications.

RING ROLLING

Precision rolled rings manufactured on our fully automated state-of-the-art ring mill ensuring repeatability in the production of high performance components.

BAR STOCK

Since formation in 1986, SQA have been the preferred supplier of round bar stock in nickel alloys and stainless steels, trusted for reliability in the most challenging environments.

GROUP CAPABILITIES

HEAT TREATMENT

Over 30 furnaces handling loads of up to 25 tonnes and 10 metres long with water, oil, and polymer quenching capabilities. NADCAP approved.

TESTING

Mechanical, metallurgical, and analytical. NADCAP approved.

NON-DESTRUCTIVE TESTING

Ultrasonic Testing, Liquid Penetrant, Magnetic Particle & Visual Inspection.

MACHINING

Utilising over 30 first stage and CNC machine centres for turning, milling and boring.
